(54) WWW FILE READING SYSTEM USING BAR CODE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a system for performing access to a WWW home page by an one-action operation using a bar code.

SOLUTION: A system server 100 is connected through a communication line N with WWW, and a client computer 200 is provided so as to be connected with the system server 100. The system server 100 is provided with an identification code applying means 110 for applying an original identification number corresponding to an URL on the WWW, and a data base 120 for storing the identification code and the URL by making them correspond to each other. A bar code reader 300 is connected with the client computer 200, and the identification code and an instruction code displayed as a bar code can be read. When the bar code of a desired home page is inputted by the bar code reader 300, the system server 100 reads the URL, and operates link with the home page.
